# Karandaaz Equity Investment in

## HAC AGRI

### Highlights of Karandaaz Investment

“ Karandaaz Pakistan is investing in HAC Agri which will be the first state-of-the-art Controlled Atmosphere Warehouse in Punjab. Introducing innovation in the agriculture sector, the project is expected to start commercial operations in 2019.

Karandaaz investments in high growth businesses, such as HAC Agri, are boosting job creation and economic growth in the country.”

### Impact of Karandaaz Investment

156 new jobs, including more than 70 for youth and women

Improves post-harvest storage of the produce and its longevity; making it possible for farmers to reap better rewards and reduce wastage in the agricultural value-chains

### About HAC Agri

HAC Agri Controlled Atmosphere Warehouse will ensure availability of off-season fruits and vegetables with same freshness and quality as that in-season. The HAC Agri is planned to have an installed capacity of 3,000 MT. A controlled atmosphere warehouse is an agricultural storage facility in which the concentrations of oxygen, carbon dioxide, and nitrogen, as well as the temperature and humidity of a storage room, are regulated. Both dry commodities and fresh fruits and vegetables can be stored in controlled atmosphere warehouses.
